USER GUIDE

# Tiered Microfinance

One app for the whole lending chain: a federation funds credit societies, societies lend to their members, and every rupee repaid finds its way back, split and reconciled to the paisa.

- Apex federation · lends at 9.5%
- Credit society · lends at 11.5%
- Member · repays monthly

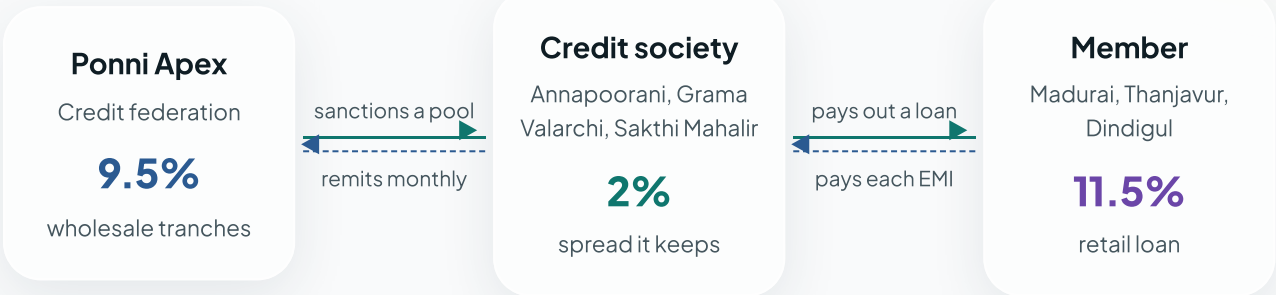

The demo opens on the federation's view, shown above. Switch to any other role from the demo bar at the top of every screen.

HOW IT WORKS

# Three tiers, one book

The federation lends wholesale to a society; the society lends retail to its members. The society keeps the 2% between the two rates and carries the work of collecting.

How each rupee of a member's 11.5% interest divides

## Who uses it

| Role | Person in the demo | What they do |
|---|---|---|
| Apex officer | Dr. Sudha Ramanathan | Watches exposure across societies, reviews pools, sanctions or declines funding. |
| Secretary | Meenakshi Sundaram | Runs the society: decides large loans, builds pools, draws down, pays out, remits, reads the books. |
| Loan officer | Karthik Rajan | Takes and appraises applications, approves up to ₹50,000, records collections. |
| Member | Veerappan Pandian | Applies for a loan, follows it step by step, sees the schedule and what is due. |
| Auditor | R. N. Subramanian | Sees every society screen, changes nothing. |

## Rules the app keeps for you

✓ **Whole rupees.** Instalments are whole rupees; amounts on screen round half up. The books keep every paisa.

✓ **Fair repayment.** Loan repayments stay under 50% of monthly income; no prepayment fee, as RBI directs.

✓ **Grace, then penal.** 7 days of grace, then 2% a year penal interest on what is overdue.

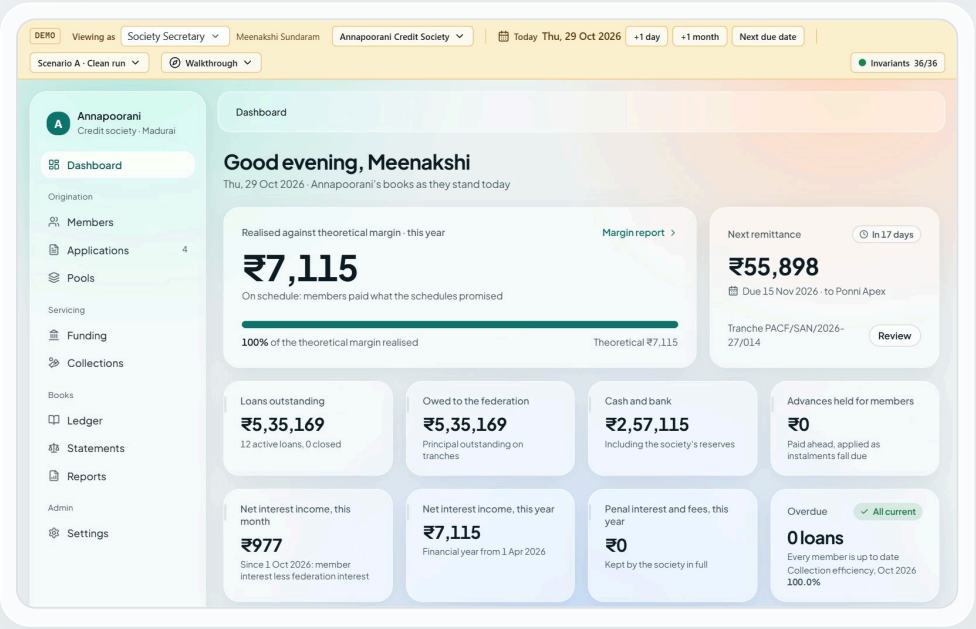

✓ **Books that balance.** 36 live checks run after every action; the demo bar shows them green.

GETTING AROUND

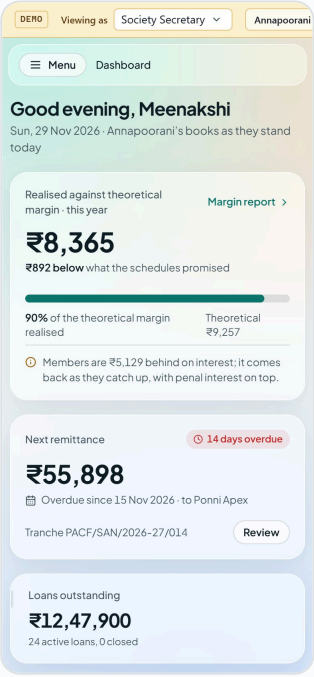

# The demo bar drives everything

The amber strip at the top is not part of the product: it lets you play every role, move time and load prepared stories.

| Control | What it does |
|---|---|
| **Viewing as** | Switch role. Each role sees only its own screens and can do only what it is allowed to. |
| **Society** | For society roles, choose whose books you are looking at. |
| **Today · +1 day · +1 month · Next due date** | Move the simulated clock. Instalments fall due, arrears and penal interest build, remittances come up. |
| **Scenario** | Load a prepared story: A, a clean run; B, members falling behind; C, prepayment and recovery. |
| **Walkthrough** | Guided tours. “A member’s loan, start to finish” takes you through the whole chain. |
| **Invariants 36/36** | Live checks that the books balance and every rule holds. |

**On a laptop.** The sidebar lists the role’s screens; the top bar shows where you are. Every amount is a link to the entries behind it.

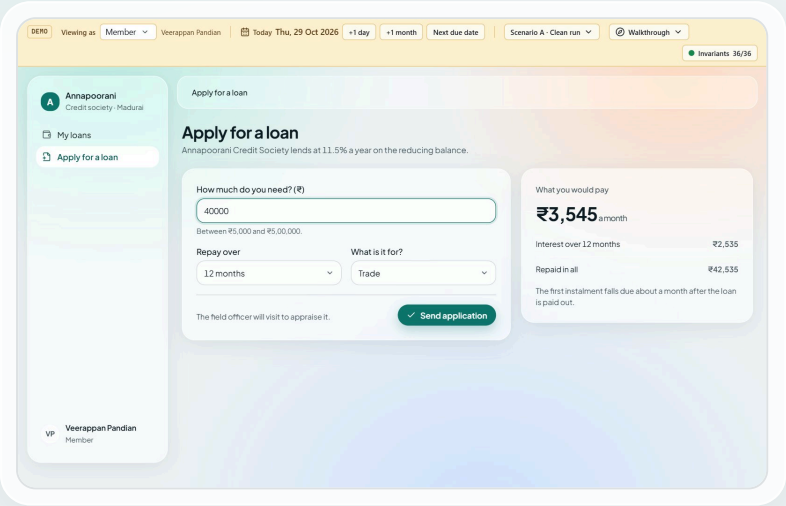

**On a phone.** Menu opens the sidebar; the demo bar scrolls sideways.

FOR MEMBERS

# Apply, follow, repay

A member applies on their own, sees the instalment before sending, and follows the application to the day it is paid out.

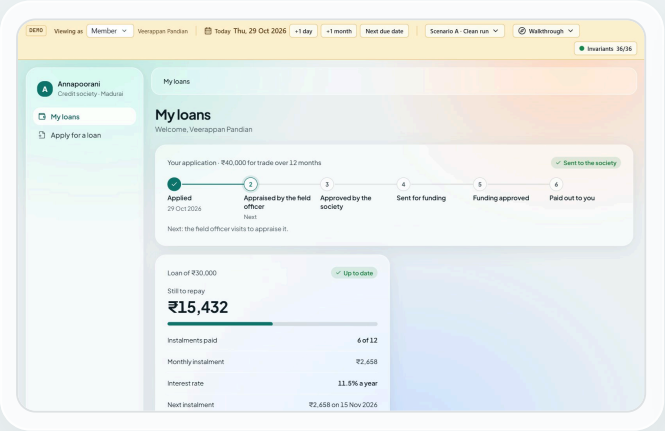

**Apply for a loan.** Type an amount (₹5,000 to ₹5,00,000), choose the months and the purpose; the monthly instalment appears as you type.

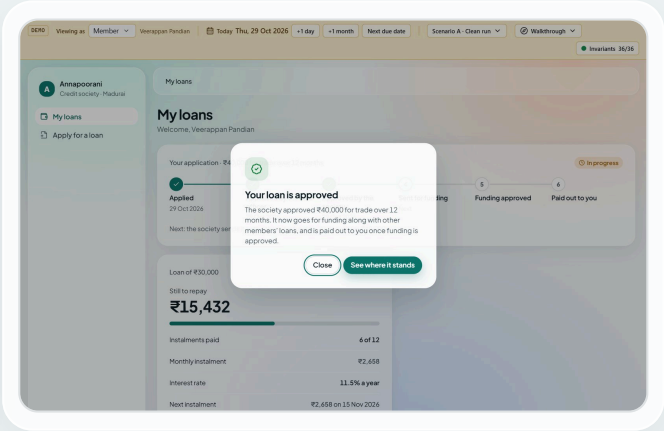

## How to apply

1. Open **Apply for a loan** in the sidebar.
2. Enter the amount, how long to repay over and what it is for.
3. Check the monthly instalment and the total repaid.
4. Choose **Send application**. It goes straight to the field officer.

i A member can have one application in progress at a time, and only ever applies for themselves.

**The tracker.** Six steps from Applied to Paid out to you, each dated as it happens, with what comes next.

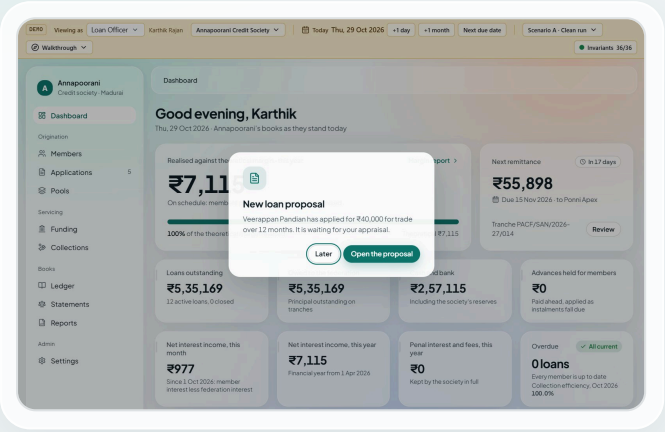

**Pop-ups.** The member is told when the society approves or turns it down, with the reason, and when the money is paid out.

FOR THE LOAN OFFICER

# Appraise, decide, collect

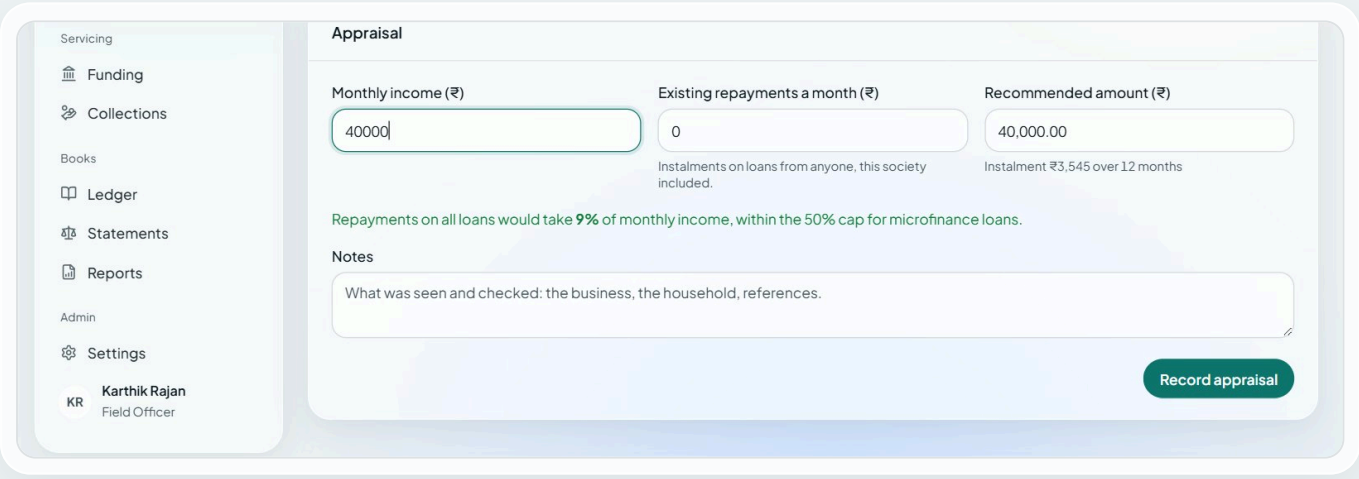

The field officer hears of each new proposal at once, appraises it against the member's income, and records what members pay.

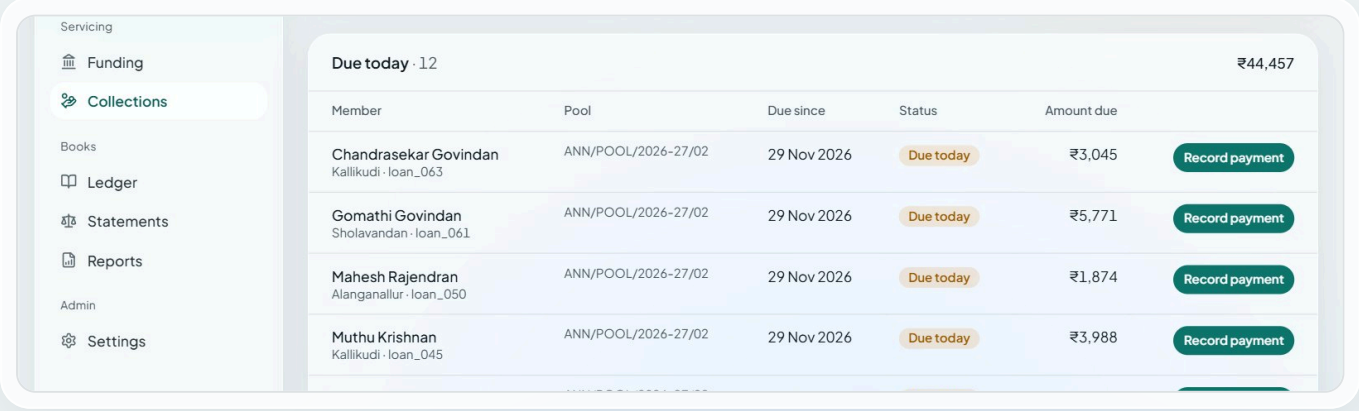

**New loan proposal.** When a member applies, the officer sees a pop-up; **Open the proposal** goes straight to it.

## Appraisal and decision

1. Enter the member's monthly income and other obligations.
2. The repayment burden shows against the 50% cap.
3. **Record appraisal**, with a recommended amount.
4. Up to ₹50,000 the officer approves or rejects; above that the secretary decides, and gets a pop-up.

**Appraisal.** Income, obligations and the recommended amount, with the burden worked out as you type.

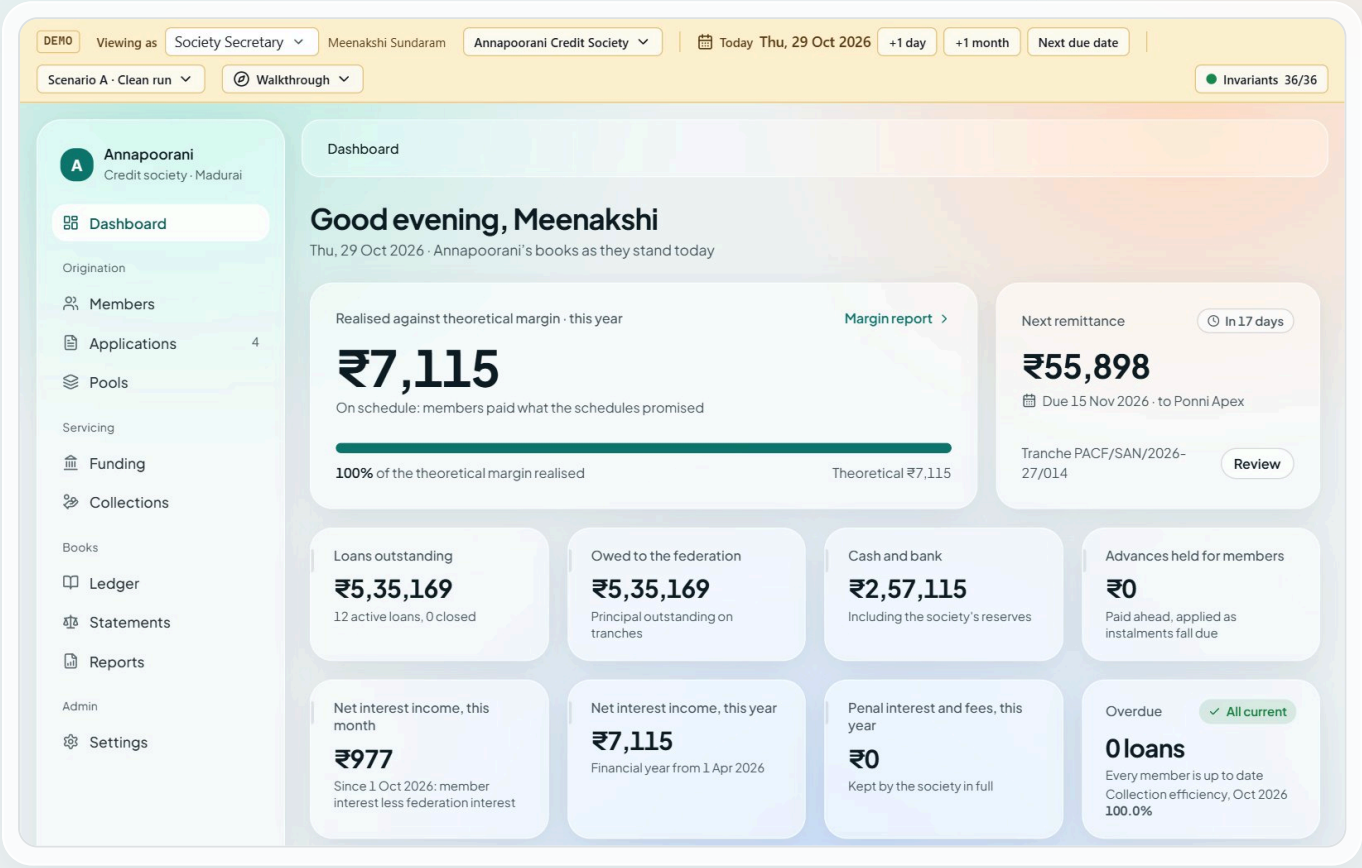

**Collections desk.** What is due today and overdue. **Record all due today** takes every instalment in one go; each payment shows the share owed on to the federation and the share the society keeps.

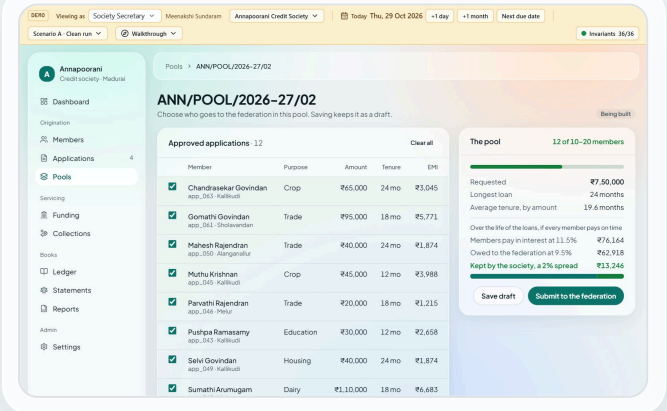

FOR THE SOCIETY SECRETARY

# Pool, fund, pay out

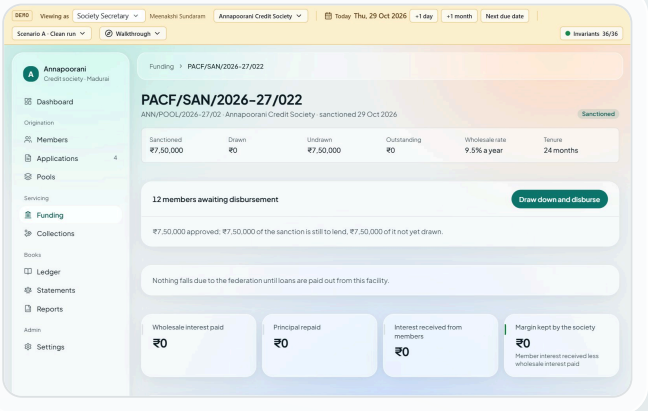

The secretary sees the society's position at a glance, gathers approved loans into a pool for the federation, and pays members out once it is funded.

**Dashboard.** The margin realised against the 2% the schedules promise, the next remittance, the books, earnings and loans by days past due.

**Pools.** 10 to 20 approved loans go to the federation as one request; the cost, income and spread update as you add them. Then **Submit to the federation**.

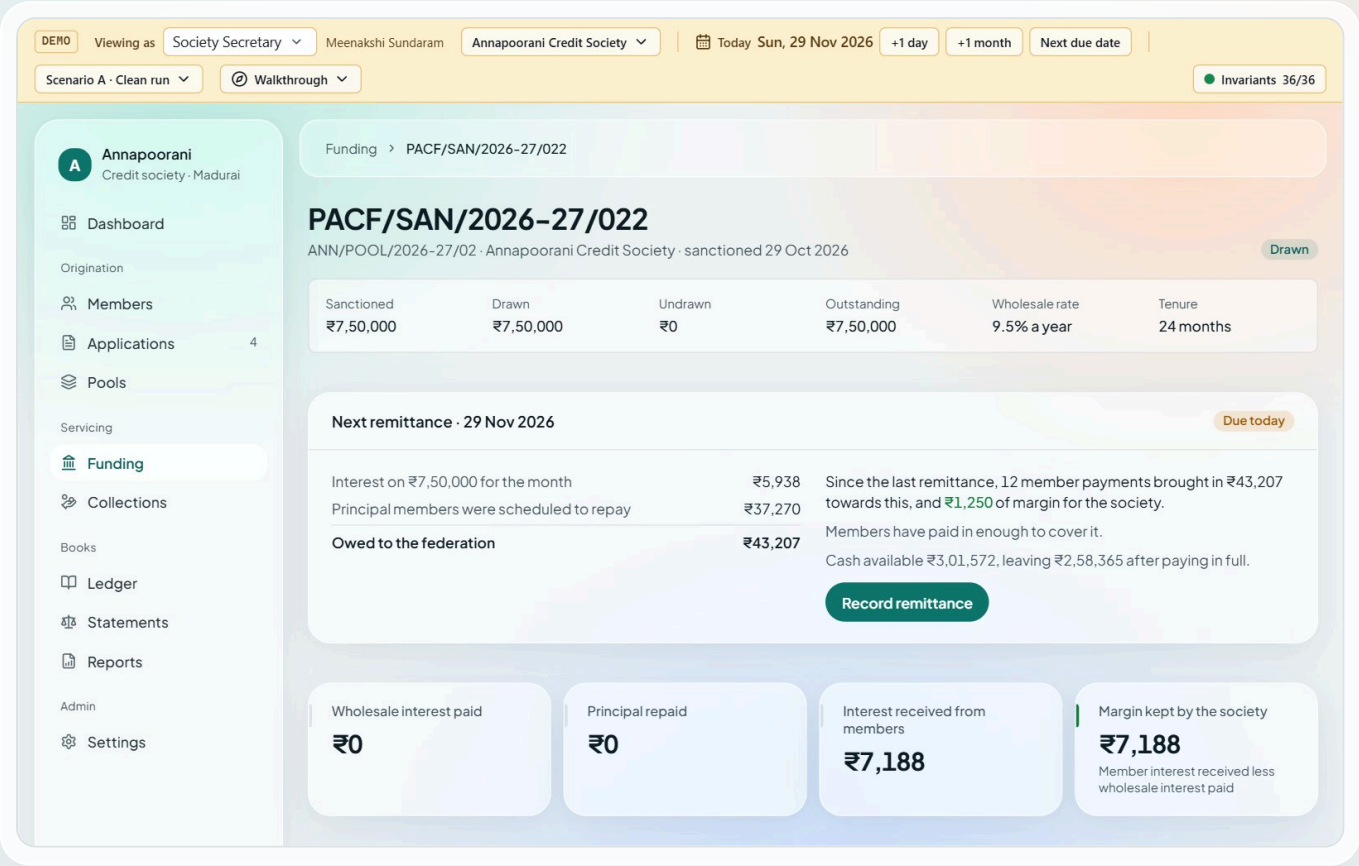

**Funding.** Once sanctioned, **Draw down and disburse** pays every member in the pool; each loan gets its schedule.

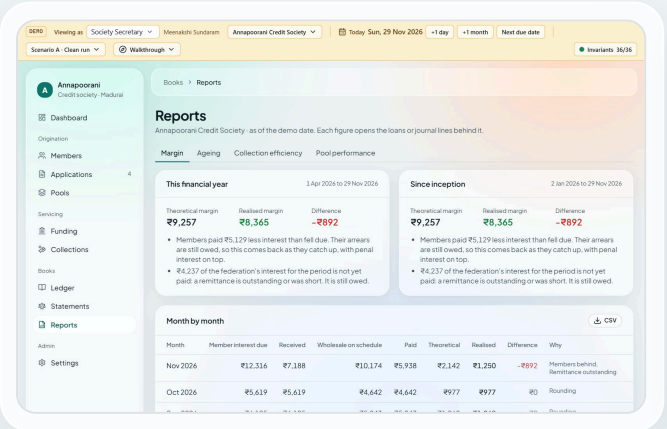

FOR THE SOCIETY SECRETARY

# Remit and read the books

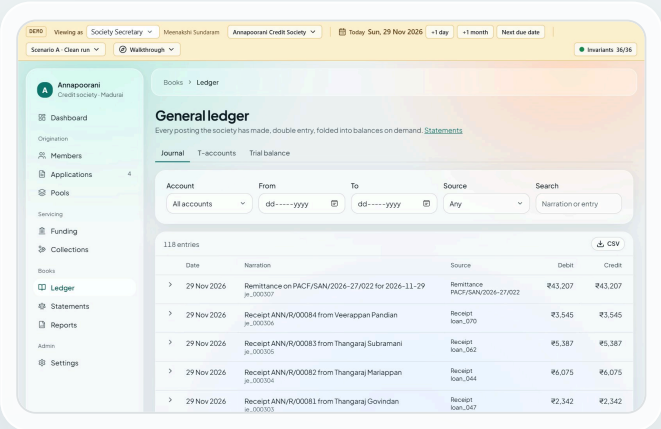

Each month the society pays the federation its interest and the principal members repaid, then keeps the difference. Every figure traces to its journal entries.

**Remittance.** What is owed to the federation this month, what members have paid towards it, and the margin earned. **Record remittance** pays it.

**Reports.** Margin analysis, ageing, pool performance and collection efficiency, each explained in words.

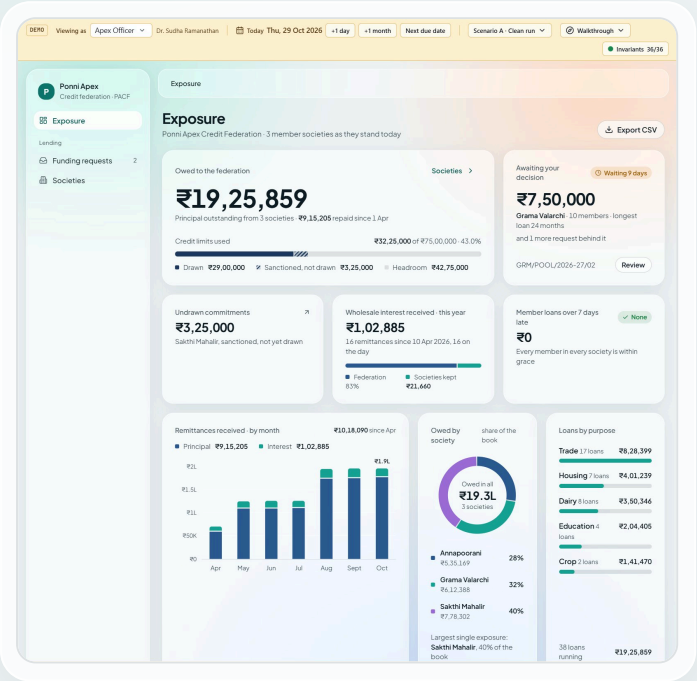

**Ledger and statements.** Double-entry journal, T-accounts, trial balance, income statement and balance sheet.

FOR THE APEX OFFICER

# See the risk, fund the pools

The federation sees what it is owed across every society, which pools wait for a decision, and how each society repays.

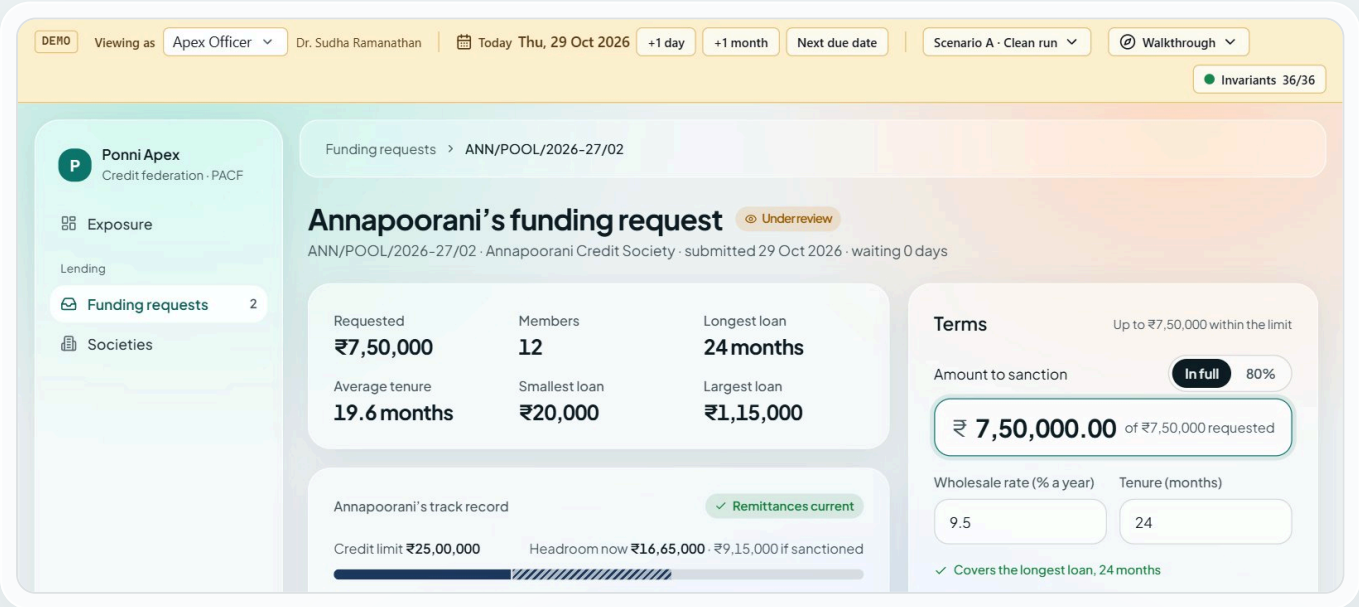

**Exposure.** Owed to the federation, credit limits used, the request waiting longest, and charts of remittances by month, who owes what and what members borrow for.

## Read it in a minute

1. **Owed by society**: the largest single exposure, as a share of the book.
2. **Remittances by month**: principal and interest coming back.
3. **Where the interest went**: the federation's 9.5% against the society's 2%.
4. **Societies**: each limit, remittances on the day, members late, pools to review.

## Review and sanction

1. Open the request from **Funding requests** and **Begin review**.
2. Check the society's track record and what the money is for.
3. Set the amount (in full or 80%), the rate and tenure, then **Sanction**; or **Decline** with a reason.

**Review and sanction.** The terms panel shows how the interest divides before you sanction; a short sanction asks the society to re-scope its pool.

A LOAN, START TO FINISH

# Nine steps, four people

Every step updates every screen at once: the dashboards, the federation's charts and the member's tracker. Try it with Walkthrough → "A member's loan, start to finish".

1

### Member applies

Amount, months, purpose; the instalment shows as they type.

Member

2

### Officer is told

A pop-up: new loan proposal, opened in one click.

Loan officer

3

### Appraise and approve

Income against the 50% cap; up to ₹50,000 the officer decides.

Loan officer

4

### Member is told

A pop-up: approved, or not, with the reason.

Member

5

### Pool and submit

10 to 20 approved loans go to the federation together.

Secretary

6

### Federation sanctions

Review the track record, set terms, sanction at 9.5%.

Apex officer

7

### Draw down and pay out

One drawdown, a disbursement and a schedule per member.

Secretary

8

### Members repay

Each instalment splits: on to the federation, kept by the society.

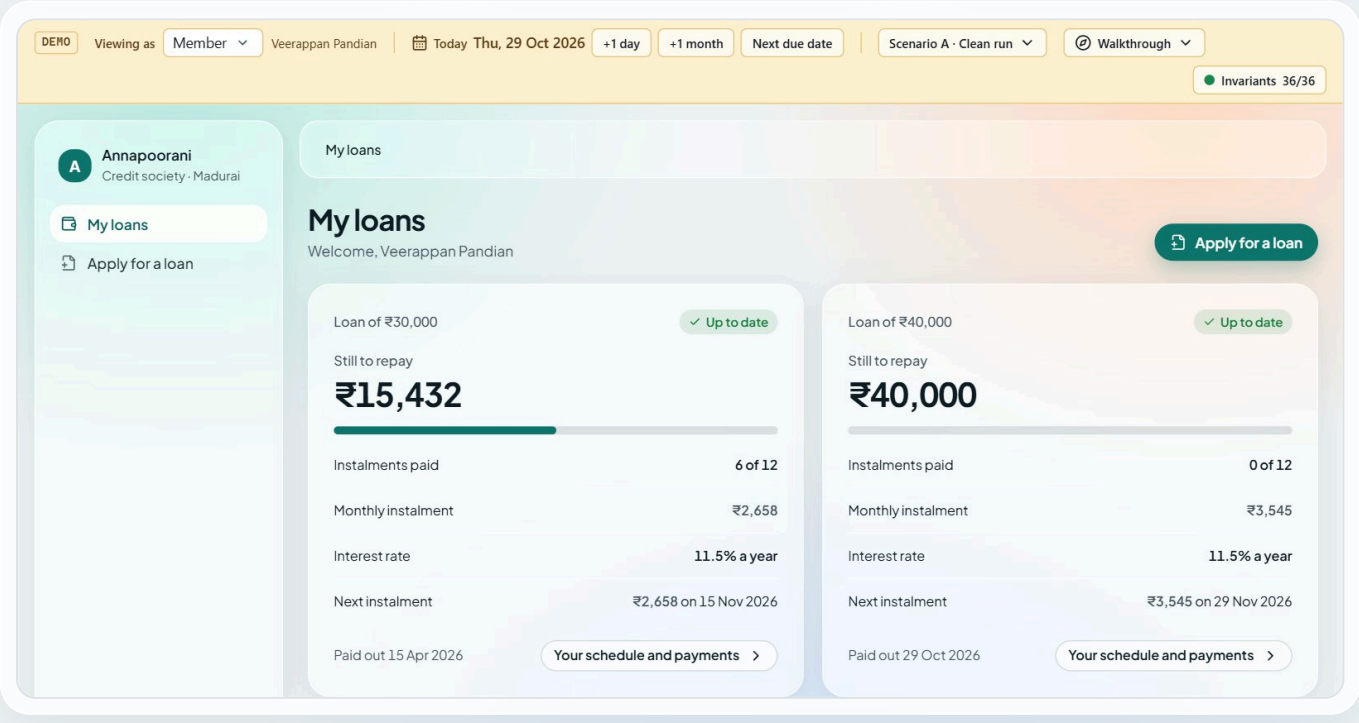

Loan officer

9

### Society remits

The federation's share goes up; the society keeps its 2%.

Secretary

**The end of the journey.** The member sees the new loan beside the old one: what is left to repay, the whole-rupee instalment and the next due date.

WHY IT STANDS OUT

# Highlights

What makes Tiered Microfinance worth a federation's, a society's and a member's time.

## 3 tiers

**The whole chain in one app**

Federation, society and member work from the same live books, so nobody re-keys a figure or waits for a month-end report.

## ₹1

**Every rupee traced**

Each instalment splits into what goes to the federation and what the society keeps. Every figure opens the journal lines behind it.

## 2%

**Margin you can see**

Societies see the spread the schedules promise against what they actually earn, and why the two differ.

## 36

**Books that always balance**

Thirty-six checks run after every action. If anything were to drift, the demo bar would say so at once.

## 6 steps

**Members in the loop**

Members apply on their own, follow each step and get a pop-up when it is approved and paid out. No more "any news?" visits.

## 1 glance

**Risk for the federation**

Exposure, concentration by society, remittance punctuality and members late, in charts the board can read.

## RBI

**Fair-lending rules built in**

A 50% repayment cap, no prepayment fee, grace before penal interest and approval limits by role.

## Mobile

**Made for the field**

A modern, light design that works as well on a field officer's phone as on the secretary's laptop.

### From application to remittance, in one flow

Tiered Microfinance gives every tier the same truth at the same moment: faster loans for members, clearer margins for societies and real-time oversight for the federation.
